

SuperCool Series SLA-205-24-22-00-00 Liquid-to-Air Thermoelectric Assembly

The SuperCool Series Liquid-to-Air thermoelectric assembly is a high performance thermoelectric based liquid cooler. It is designed to temperature control small chambers used in medical diagnostics, lasers, imaging systems or sample storage compartments in analytical instrumentation. This unique design offers a high performance hot side heat dissipation mechanism that convects heat more efficiently than conventional heat exchanger technologies. The design utilizes custom thermoelectric modules to maximize cooling capacity and premium grade fans to keep the noise down. Moisture resistant insulation is used to keep condensation from penetrating into the TEM cavity. This unit operates at 24 VDC and is designed for indoor lab use environment. Custom configurations available upon request.

Laird Manufacturer Part Number: 387000624

Patent Pending

FEATURES

- High Performance
- Compact Form Factor
- Reliable Solid-State Operation
- RoHS Compliant

APPLICATIONS

- Analytical storage compartment temperature control
- Medical diagnostic chamber refrigeration
- Laser or Imaging Cooling

TECHNICAL SPECIFICATIONS		
TEA Model	SLA-205-24-22-00-00	
Heat Transfer, Cold Side	Liquid	
Heat Transfer, Hot Side	Air	
Cooling Power	202 W @ Δ T=0°C and Ta=35°C, Tolerance ± 10%	
TEM Input Power		
Voltage, Nominal	24 VDC	
Current, Nominal/Initial	6.9/8.1 Amps @ Δ T=0°C	
Fan Input Power		
Voltage, Nominal	24 VDC	
Current, Nominal	0.5 Amps	
Fan Noise	62.6 dBA	
Dimension (L x W x H)	300 x 180 x 107 mm	
Weight	4.1 kgs	
Operating Temperature	-20°C to 70°C	
Packaging	Individual cardboard box	

PERFORMANCE CURVES

TEA performance at Ta=35°C

Typical Pressure - Flow behavior of liquid block assembly. (For more information contact Laird customer service.)

ISOMETRIC DRAWINGS

ELECTRICAL CONNECTIONS

OBJECT	COLOR	POLE
TEM +	Red	1
TEM -	Black	2
FAN +	Red	3
FAN -	Black	4

Warning: Do not reverse current or use PWM-regulation on fan supply.

INSTALLATION INSTRUCTIONS

- 1. The TEA must be protected from external force or violence.
- 2. The power line to the assembly needs to be protected by a fuse. The fuse rating should be of at least the nominal current of the assembly. It must withstand 150% of rated current for at least 60 seconds. This is valid at Ta=35°C. Fuse ratings for other ambient temperatures (X°C) can be calculated with the formula I[X°C]=I[35°C]/(1+0.005*(X-35)). This is valid when regulating with an ON/OFF regulation. At rapid temperature cycling where this is applicable, there can be need for even higher fuse ratings.
- 3. Cooled parts need to be isolated from air humidity to minimize risk for condensation and thermally insulated for best performance.
- Max ripple on supplied power =5%. 4.

SERVICE

Units are generally maintenance free, however occasionally it is recommended to clean the heat sinks and fans of debris. This is best done with compressed air.

Laird warrants to the original end user customer of its products that its products are free from defects in material and workmanship. Subject to conditions and limitations Laird will, at its option, either repair or replace any part of its products that prove defective because of improper workmanship or materials. This limited warranty is in force for the useful lifetime of the original end product into which the Laird product is installed. Useful lifetime of the original end product may vary but is not to exceed five (5) years from the original date of the end product purchase.

Any information furnished by Laird Inc. and its agents is believed to be accurate and reliable. All specifications are subject to change without notice. Responsibility for the use and application of Laird materials rests with the end user, since Laird and its agents cannot be aware of all potential uses. Laird makes no warranties as to the fitness, merchantability or suitability of any Laird materials or products for any specific or general uses. Laird shall not be liable for incidental or consequential damages of any kind. All Laird products are sold pursuant to the Laird Terms and Conditions of sale in effect from time to time, a copy of which will be furnished upon request.
